# SERVICE AREAS

## TRAINING

Part of the philosophy of our company is to participate in academic projects, either through training of all equipment that we provide, or through workshops and conferences on issues relevant to criminology.

To this end, we have available domestic and foreign experts.

Given the importance of making full use of all funds invested in equipment, supplies and technology, SF International Ltd. in its commitment to customers has built a modern laboratory for practical issues in their fields. We have the latest technology to deliver certified training to groups of up to 12 people.

# SERVICE AREAS

## ADVICE

As with the training, we have national and international staff to provide advice on the implementation of equipment, technologies, services and solutions applicable in different fields of forensic science.

We worked actively in the development and advice on the implementation of the first and most complete mobile forensic laboratories in Colombia. We were also involved in the design and implementation of portable starter kits for handling any crime scene.
